# XMT12.7A EXTENDED LIFE PUNCH

## FOR EUROMAC XMTE10 MULTI TOOLS

Mate's XMT12.7A adjustable length punch builds on the success of our innovative, high performance 24mm XMT24A punch. The inventive adjustable design allows punch length adjustment simply by rotating the punch head. When coupled with the XMT12.7A's standard high speed steel punches, **grind life can be tripled\***. Mate's XMT12.7A punch is fully compatible with newer Euromac® XMTE10 multi tools and partly compatible with older XMTE10 models.\*\*

### PUNCH:

- Up to 3 times the grind life vs. one-piece designs.
- High speed steel with superior hardness and toughness for extended intervals between regrinds.
- Hardened pin for precise orientation of punches for improved piece part quality.
- 1/4 degree back taper and near polished punch flanks to reduce friction, eliminate galling, and maximize punch life.
- Maxima™ coating and Nitride treatment available for extreme applications.

### PUNCH HEAD:

- Made from durable tool steel for toughness and long life.
- Integral lug for precise orientation.
- 1 rotation = 0.049(1.25) length, can be adjusted in less than 0.049(1.25) increments.
